PROFILE SUMMARY

I'm a software developer with a knack for building web solutions that matter, using a diverse toolkit that spans the MERN stack (MongoDB, Express.js, React.js, Node.js) and extends into emerging tech like Bun, generative AI, and low-code/no-code platforms. What I Do Best: MERN Mastery: I bring applications from idea to launch, ensuring they're both powerful and user-friendly.also I have knowledge of High level and low level system designing. On the Cutting Edge: Eager to explore new tech, I've dived into Bun and generative AI to stay ahead. API Expertise: Skilled in crafting and connecting APIs with REST and GraphQL for seamless data flow. AWS Savvy: Proficient with AWS tools like Lambdas, RDS, Dynamodb and more, I ensure apps are scalable and reliable. Innovation Enthusiast: I'm all about leveraging the latest in AI and automation to speed up development and introduce next-gen solutions.
